

## LOCAL ITEMS.

**PIONEER MILLS.**—Negotiations are in progress having for their end the sale of the Pioneer Flouring Mills, of this city, to a wealthy miller of Ohio, and the hitch in the transfer, it is said, hangs on the ground rent of the property on which the buildings are erected, and which belongs to the corporation. The ground rent amounts to \$1720, and the tax on the buildings to \$108 per annum, and if a reduction of this sum can be effected, it is reported the sale will be consummated at once, and the necessary repairs to the mills be immediately commenced so as to have them ready for operation before the next harvest.

**DRAMATIC READINGS.**—Mr. John A. Veitch, Teacher of Elocution at John's Academy, will give readings from the Poets at St. Mary's Hall, this evening at 7½ o'clock. He will be assisted by some of the students, who have been under his tuition for a week or two, and as the object of the entertainment is simply to give a specimen of Mr. Veitch's qualifications as a teacher, there will be no charge for admission. Our citizens generally are invited, as from what we hear of Mr. Veitch's abilities as an elocutionist, those who attend will be most agreeably entertained.

**A. L. & H. R. R.**—The schooner B. C. Scribner arrived here yesterday with two hundred tons of railroad iron, to be used in the extension of Alexandria, Loudoun and Hampshire Railroad to Mercier's Station. This amount of iron, with about forty more tons, now on the way here, will be sufficient to complete the proposed extension, and by the first of next month, it is confidently expected, trains will be running to the point, which, until next summer, will be the terminus of the road.

**WINCHESTER & STRASBURG R. R.**—The commissioners appointed to assess land damages along the contemplated line of this road, are proceeding in their work. The Shenandoah Herald says that from the point where the road enters Shenandoah at Cedar Creek, it passes through the choicest portion of several farms, and is almost a perfect plane to the junction, a distance of about four miles; on account of which the cost to the company will be but small, as there will be no cuts or fills, and very easy grading.

**ANXIOUS TO ATTEND A BALL.**—A young lady, residing on the upper end of Washington street, whose parents had refused her permission to attend the ball of the Friendship Fire Company, last night, after dark, as the front door of her house was locked, jumped from the second story window, and repairing to a neighbor, where she had before sent her ball dress, attired herself, and participated in the forbidden festivities.

**CORRECTION.**—In the notice of the Washington and Yesterday's Gazette, Col. Geo. W. Brent's name should have appeared as counsel for the Adams' Express Company. Messrs. Brent & Wattle are the counsel for the Stockholders of the A. & W. R. R. Co., but in this instance Col. B. appeared for the Express company, the stockholders not being a party to the action.

**ALEXANDRIA.**—The Shenandoah Herald says: "The merchants of Alexandria have laid in large supplies of goods of all kinds, expecting the Valley merchants to give them a call before they pass through to Baltimore. We hope that they will not be disappointed, for we have a love for this good old Virginia town. Several merchants of this place assured us that they intended to make a part, at least, of their purchases in Alexandria."

**JUVENILE TEMPERANCE SOCIETY.**—At the last regular meeting of the Juvenile Temperance Society of Alexandria, held in their hall, over the Auditor's office, the following named officers were elected to serve for the ensuing quarter: President, N. B. Shirley; 1st Vice President, Charles W. Duffey; 2d Vice President, Harry Kirk; Secretary, H. C. Clark; Treasurer, Edgar Campbell.

**CANAL NEWS.**—Boats from Cumberland continue to arrive very slowly, though a considerable increase in the canal trade is looked for daily. During the past month 626 boats have reported at the Collector's office in Georgetown, and the tolls collected there amounted to \$6,000. This is not a fair indication, however, of the business of the canal, as most of the charges are paid at Cumberland.

**TOBACCO TRADE.**—The tobacco carrying trade between this city and Farmington has become of late a matter of considerable importance. The wharf of the Baltimore steamer, Express, here, has a large number of hogheads continually stored on it, awaiting the departure of that steamer. The steamer Fairy brings it to this city. She brought up sixteen hogheads this morning.

**LEESBURG EXCURSIONISTS.**—Notwithstanding the unpropitious appearance of the weather at the time the train on the Alexandria, Loudoun and Hampshire Railroad left Leesburg this morning, about one hundred persons availed themselves of the opportunity afforded by the advertised excursion trip to-day, to visit this city, Washington and Mount Vernon.

**THE E. C. KNIGHT.**—The steamer E. C. Knight, Capt. Joseph Denty, sailed for New York to-day, so crowded with freight that a large quantity of tobacco to have been sent by her had to be left; and with a full complement of passengers, among whom were the Rev. Kiazio J. Stuart, wife and daughter, who will stop at Norfolk.

**PACKARD'S MAGAZINE.**—Packard's Magazine for October has been received from the publishers in New York. It is the monthly in which the sensation story of the Wickedest Man in New York appeared, and each number contains an article written by the author of that story—Oliver Dyer. The contents of this number are as usual very interesting.

**POLICE REPORT.**—MAYOR'S OFFICE.—A colored girl named Duce, on complaint of Mrs. Jackson, for abusing the daughter of complainant, was discharged and the costs of the case assessed to both parties.

**MOUNT VERNON COTTON FACTORY.**—The sale of the Mount Vernon Cotton Factory, advertised in to-day's Gazette, does not imply that work there will be suspended. On the contrary, arrangements have been made for an increase in the operations heretofore conducted.

**BALL.**—The ball of the Friendship Fire Company, at the Assembly Rooms last night, though not very numerous attended, was a very pleasant affair, and all who were present expressed themselves as delighted with the evening's enjoyments.

**PROPERTY SALE.**—The residence of Dr. E. B. Addison at the head of King street, with eight acres of land adjoining, was sold yesterday by John H. Parrott, auctioneer, to Dr. J. H. Bayne, of Prince George's county, Maryland, for \$2,250.

**TRIAL OF STEAM FIRE ENGINE.**—The new steam engine of the Friendship Fire Company will be tried to-morrow evening at 4 o'clock. The hose to be used on the occasion has been borrowed from the Washington City Fire Department.

**STEAMER KEYPORT.**—The steamer Keyport, of the Aquia Creek line, which left here on Tuesday night last, for Baltimore, to be sheathed with iron, returned last night, and resumed her place on her route this morning.

**BACON AND GREENS.**—Dr. G. W. Bagby's lecture on Bacon and Greens, it is announced, will certainly be delivered to-night, at the Assembly Rooms.

**HEAVY DEWS** for the last three or four nights. The pastures everywhere in this section are good. The weather has again become cloudy.

**LARGE CLOTHING ESTABLISHMENT.**—S. Deaham, as will be seen by his advertisement in to-day's Gazette, has received his fall stock of goods, and is now prepared to supply the country and city trade with stocks of clothing at prices which will compare favorably with New York quotations. Mr. Deaham has succeeded in building up a trade in this city second in magnitude to none of a similar character in the State; and from his emporium most of the clothing sold in the Piedmont and Valley sections of the State is obtained. For the city trade his custom-made work always equals expectations.

**OYSTERS.**—Mr. Owings, at his oyster opening establishment on the wharf, near the foot of King street, receives daily supplies of fine oysters, which he sells to town and country customers, at fair prices. They are opened fresh and with care, and are always good.—Give him a call.

**CHILLS AND FEVERS.**—Who would have chills when they can be so readily cured by using any of the following, all of which can be purchased at  
COOK & KELLEY'S Drug Store,  
107, King street.

Jay's Ague Cure, Shallabarger's Pains Expeller, Ague's Ague Pills, Moore's Radical Ague Cure, Shober's Remedy for Chills, Bruin's Pills, Desbler's Ague Pills, Trapper's Remedy, or Oregon Ague Cure, Strickland's Ague and Fever Medicine.

## TELEGRAPHIC NEWS.

**SPECIAL DISPATCHES TO THE GAZETTE.**  
**IMPORTANT FOREIGN NEWS.**  
**Unsuccessful attempt to Assassinate the Viceroy of Egypt—From Spain.**—**THE PROGRESS OF THE REVOLUTION.**—ALEXANDRIA, EGYPT, Oct. 1.—While the Viceroy of Egypt was visiting an illumination in a narrow street in Cairo, last night an attempt was made to assassinate him by dropping a steel ball armed with sharp barbs on his head. The Viceroy escaped uninjured. The perpetrator is unknown.

MADRID, Oct. 1.—Afternoon.—The Marquis of Navalech died from his wounds this morning in this city.  
Gen. Calvo, while preparing to fly to France, was arrested, and handed over to the revolutionary junta, at Burgos.  
The city of Madrid is perfectly quiet.  
Gens. Prim and Serrano have not yet arrived here.

Don Sebastian, son of the late Infanta Pedro, grand uncle of the Queen, advised the Queen to inaugurate a civil war, but the Basque provinces refused to supply him or money for that purpose, and have since given in their adhesion to the revolution.

**From Philadelphia.**  
PHILADELPHIA, Oct. 2.—A sensation was caused this morning by the arrest of twenty-one Baltimore roughs at the depot, on a charge of coming here with the purpose of being illegally assessed and of voting. They were marched under guard of the police through Chestnut street, which at the time was crowded with citizens and strangers. They will be heard this afternoon.

At this hour (11 a. m.) the weather is clear and pleasant, and thousands of citizens line the streets waiting for the procession of the "boys in blue," which has not yet moved.

**REMARKS.**—The market closes quietly.—Flour is dull but a limited demand, confined principally to the retail trade. Sales of extra at \$10.50a11. In wheat, there is but a limited business doing, and prices are somewhat depressed. The offerings on exchange today were 1434 bushels red, most of which was taken at 160, 200, 205, 210, 215, 230, and 235. Some lots of prime light, with sales at 120. Offerings of corn light, with sales at 120. Sales of damaged, and 12a123 for good mixed. Sales of 967 bushels of oats at 67. Very little Rye offered and quotations without change. Fish in fair demand. Fertilizers moving off briskly. Plaster in good supply. Salt in request. Wool quiet. Butter firm. Bacon in fair request. Sugar in fair supply. Eggs steady and wanted. Green apples in good demand. Onions firm.

**BALTIMORE CATTLE MARKET.** Oct. 1.—Beef Cows and Prices as ranged as follows: Old Cows and Calves at 3.25a4; ordinary thin Steers, Oxen and Cows 4a5; common to fair Stock Cattle 4.75a5.25; fair quality Beaves 6a7, and the very best Beaves 7a8.25 per 100 lbs, the average price being about \$5.25 gross. The market closed dull at about the rates of last week except for common and inferior grades, which were 25 cents per 100 lbs lower.

**SHEEP.**—The market has been only moderately supplied during the past week, and under a good demand, quotations have improved about 1c per lb. Prices to-day ranged as follows: Fat sheep at 4½a5 cents per lb gross. Stock sheep 2a3 per head. Lambs at 2a4 per head.

**HOGS.**—The supply of Hogs during the past week has been about equal to the demand, but rates for all grades are a shade lower. Prices to-day ranged as follows: Common to fair live Hogs 11a13, and good to extra fat 13.50a14.75 per 100 lbs dry.

**NEW YORK DRY GOODS MARKET.**—There has been a rather lively trade among the jobbers during the week, the Western purchasers having delayed so long that they could not safely cut off their purchases any longer.—But this liveliness has not had any sensible effect on the prices of domestic goods, except, possibly, to prevent a greater fall than has actually taken place. There has been a drooping tendency in almost all kinds of cotton goods, which is the natural effect of a decline in the price of the raw material. In foreign goods there has been considerable activity, and the offerings at auction have been large, particularly of merinos and muslin de laines; but prices, except for very choice styles, have given way a little.

**PENNSYLVANIA COAL TRADE.**—The anthracite coal trade continues active and the orders for coal large. The Reading railroad for the week ending Thursday last brought down of all kinds of coal 110,012 tons, making a total for the year so far of 2,557,268 tons, against 2,696,058 tons to same date last year, showing a decrease of 138,790 tons. The tonnage by the Schuylkill canal for the year thus far is 634,176 tons, against 702,508 tons to the same time last year, showing a falling off of 68,331 tons. The entire tonnage of all the companies carrying coal from this State for the past week is 391,594 tons, and for the current year 9,837,353 tons, against 9,037,563 to the same time in 1867, showing an increase of 799,790 tons.—*Phila. Ledger.*

**GRAIN MARKET.**—In regard to the grain market in Europe, the New York Daily Bulletin says:—"The present aspect of the European grain trade may be briefly characterized as offering a fair market for American supplies, but at minimum profits. The large returns arising from general scarcity are not to be looked for in the present phases of the market. The only contingency that is likely to change this aspect is the advent of a European war, which, it must be admitted, appears more imminent all the time. The collision may be postponed until the Spring, but when it comes it will arrest the regular European grain movements, and result in a largely increased demand for American breadstuffs."

**COAL TRADE BY THE C. & O. CANAL.**—There was dispatched from Cumberland last week, 10,252 03 tons of coal, forwarded by the following companies:

American	18,234.19
Borden	2,674.11
Central	754.11
Consolidation	2,423.00
C. & I. Co.	2,327.07
Hampshire & Baltimore	540.13
National	114.14
Total,	10,252.03

**GEORGETOWN FLOUR INSPECTION.**—During the month of September the Flour Inspector numbered 19,017 barrels of the following grades: City Mills—9,756 Family; 6,578 Extra; 548 Super; 160 Fine; 137 Middling; 41 Broad arrow; total, 17,222. Canal flour—760 Family; 815 Extra; 156 Super; 16 Fine; 7 Middling; total, 1,764. Besides the above there were 41 barrels of rye flour.

**Wool.**—The wool market in Baltimore is about the same in all respects as last named, except less firmness. Quote common to quarter blood unwashed at 32 to 34 cents per lb; 30s do, 26 to 28 cents; fine unwashed 29 to 30 do; tub washed 45a52 cents; common to medium fleece 41 to 46 cents; fine do, 42 to 45 cents; fleeced 28 to 35 cents per lb.

The gold market was weak at New York yesterday on sales by the government, and continued tightness of the money market.

The quotations of Virginia Railroad and State stocks and bonds in Richmond, yesterday, were without change from our last report.

As a general thing business at the Baltimore Stock Board has been unusually dull during the week.

## FERTILIZERS.

**FOR WHEAT.**  
**MAPES' NITROGENIZED SUPER-PHOSPHATE.**  
composed of pure Bones and Bird Guano, dissolved in sulphuric acid, and fermented with Fish Guano (containing 12 per cent. of Ammonia), all being reduced by fermentation and insoluble acid to a Fine Powder. Contains no insoluble mineral Phosphates, but is all available to the crop.

This soluble fertilizer, soluble by analysis the presence of 15 per cent. Soluble Phosphates, 32 per cent. Bone Phosphates, and animal matter yielding 4 per cent. of Ammonia—being identical in composition, solubility, and availability to crops with the best mixture that can be made of one part Peruvian and three parts Flour of Bone, treated with sulphuric acid. The saving to the farmer in the cost of Mapes' Super-Phosphate over that of the mixture, is \$15 per ton.

The Mapes' Super-Phosphate of Lime Company, being engaged in the manufacture of fish oil, are enabled not only to obtain large supplies of animal Ammoniacal material from the fish at low cost, but also to avail themselves of the economical process of fermentation, by the combination of the fresh animal matter with the Bones and Bird Guano, previously treated with acid, and are thereby able to furnish a quickly-acting Soluble Ammoniated Super-Phosphate at no higher rates than charged for ordinary Super-Phosphates containing a large amount of insoluble mineral Guano.

In every instance reported, Mapes' Super-Phosphate has produced as early, vigorous growth, and more permanent effects, than Peruvian Guano, Lake Burn-Yard Manure, when used on seeded down land, produces after the grain luxuriant crops of grass.

Send for descriptive pamphlet on culture of Wheat and its requirements, analysis of Mapes' Super-Phosphate by Prof. Gilman, of Richmond, S. Dana Hayes, of Boston, and other prominent chemists.
